RapidChange™

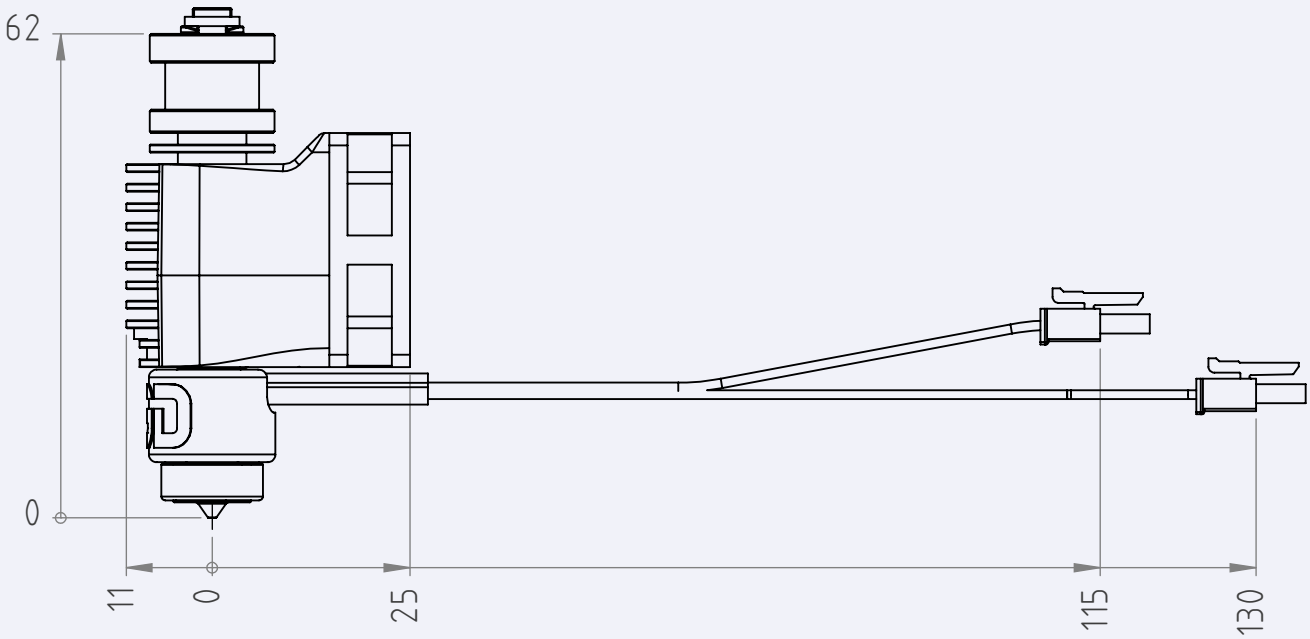
Revo™ Six

DATA SHEET

SUMMARY

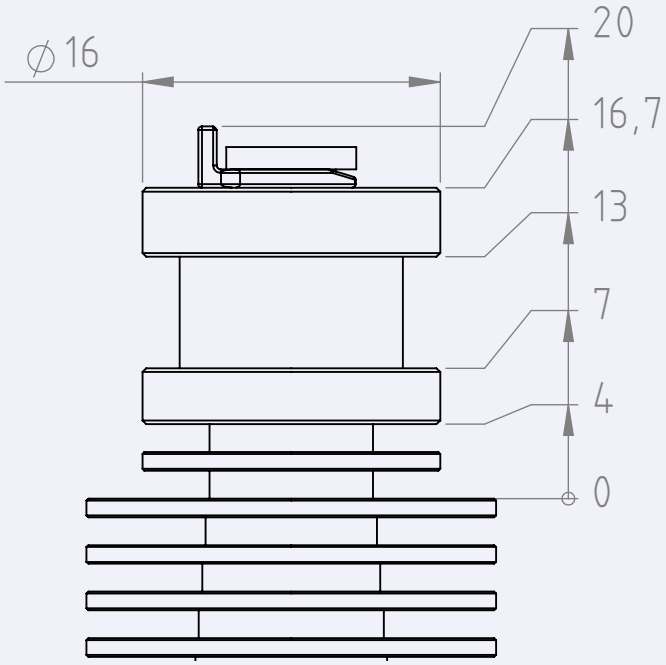
- Max printing temperature: 300°C
- Mass: ~53g
- Flow rate: 10mm³/sec (depending on filament)
- Temperature sensor type: thermistor, Semitec 104NT
- Voltage options: 12V or 24V
- Wattage: 40W
- Filament diameter: 1.75mm
- Temperature sensor type: thermistor, Semitec 104NT

DIMENSIONS



MOUNTING GUIDANCE

Mounting type: E3D Groove Mount



CABLE ORIENTATION

Turn Revo HeaterCore anti-clockwise to orient cables. Turning clockwise will cause the spring to disengage.

ASSEMBLY

There is no need to hot-tighten the Revo Six assembly. Tools must not be used to fasten the Revo Nozzle to the HeaterCore.

OPERATIONAL TEMPERATURES

Maximum recommended operating temperature: 40°C

ELECTRICAL SPECIFICATION

Fan

- 12V or 24V
- Fan current: 0.1A (12V) and 0.08A (24V)
- Fan noise: 30 dB(A)

Heater

- 12V or 24V, 40W nominal power at ambient

Temperature

- Temperature sensor: Semitc 104NT

CONNECTIONS

Fan: Molex microfit3, 2 pin vertical

Heater: Molex microfit3, 2 pin horizontal

Temperature sensor: Molex microfit3, 2 pin horizontal

Assembly is supplied with 1m cables to connect to mainboard

MATERIALS

- Heatsink: Aluminium (black anodised)
- HeaterCore: Alumina, Bronze
- Fan Shroud:

COMPLIANCE

- Reach
- RoHS
- WEEE
